

TUDOR CIULEANU FOLLOWS THE BLOCKCHAIN BUZZ AND ATTENDS MALTA BLOCKCHAIN SUMMIT AS AN INVESTOR

CLUJ-NAPOCA, 30 OCTOBER 2018 - After a successful participation at Crypto Invest Summit in Los Angeles earlier this month, Tudor Ciuleanu follows the blockchain buzz with an invitation to attend [Malta Blockchain Summit](#) as an investor. The summit is scheduled between the 1st and 2nd of November and is expected to attract over 5000 delegates, speakers, exhibitors and investors from across the world.

"I am looking forward to the summit. Malta is a country where both companies and the government understand blockchain technology and its potential for future applications. Having the regulatory framework already setup, Malta is becoming a go-to hub for blockchain innovation and one of the most desirable locations to set up shop for companies in the blockchain space.", says Tudor Ciuleanu, RebelDot CEO.

Earlier this year, the Maltese government has legislated 3 bills into law, that will provide legal certainty to the blockchain environment, involving digital financial products and services, such as virtual currencies and ICOs. This framework makes Malta the first country in the world to enact official regulations for operators in the blockchain space and has earned the country a reputation for being known as "the world's first blockchain island".

On the eve of the summit, a Blockchain Awards ceremony along with a Charity Dinner will be hosted by Eric Benz, Managing Director at Cryptopay and the Maltese President, H.E. Marie-Louise Coleiro Preca is attending as Guest of Honour: *"I am thrilled to having been invited to join the Charity Dinner with the Maltese president. The fundraiser is organized together with the BiG Foundation and all proceeds will go towards the Malta Community Chest Fund and the Kilimanjaro Challenge 12.",* said Tudor Ciuleanu.

Following the same thinking as at other similar events, the RebelDot CEO is planning to invest in interesting startups: *"I'm looking for a startup that can surprise me with their innovative idea, scaling capabilities and passion for what they do. Passion, although not quantifiable is a key ingredient weighing in my decision process."*
